

Firstcool

Cooling Equipments & Devices L.L.C.
Est. 1993

*First Choice for Your Total Requirements of
Refrigeration and Cold Storage Projects*

BRIEF SPECIFICATION OF MATERIALS USED.

INSULATION PANELS FOR COLD ROOMS

Polyurethane/PIR panels are with a density of insulation 40-42 KG/M³

Thickness 100mm, 125mm, 150mm, 200mm, Length, width and height varies as per client's requirements. All panels are with tongue and groove joints with cam-locks. The panels can be easily removed and relocated at a later stage if required.

CLADDING SHEETS

Polyester coated (pre-painted) steel sheets, aluminium sheets, stainless steel sheets and stucco aluminium sheets of different thickness and colours are available.

INSULATED FLOORS

For manual stacking insulated panel floors with water proof plywood on top, covered with chequered aluminium plate. For stacking with forklifts insulated concrete floor to suit the specific application.

DOORS

Hinged doors with chrome/ss plated hinges and locks with internal safety release, key and plastic strip curtains. Freezer room doors with heater and pressure releasing ports. Sliding doors for larger rooms. Either manually or electrically operated.

REFRIGERATION UNITS

Mono-block units installed on the cold room like a window air conditioner. Compact in size and economic in price. More noisy in the working place, due to the sound generated by the condensing units.

Split systems - Evaporator inside the cold room and condensing unit outside the cold room away from the working place. No noise disturbance at the work place. More costly compared to mono block unit, but easy to do the maintenance works.

Central systems - Used for large cold stores. More costly compared to split systems.

ACCESSORIES

Shelving and racking systems, meat rails etc made out of different materials to suit the requirements of customers are available.

MAINTENANCE AND AFTER SALES SERVICE

Our mechanics and technicians are available at service even during night hours for any breakdown calls or trouble shooting of the equipments even during holidays. Our equipments are guaranteed for one year from the date of installation. Subsequent maintenance can be arranged on yearly contract basis. We also undertake the yearly maintenance of existing equipments.
